Educating for Excellence

English for Academic Purposes (EAP) aims at preparing international students for many new challenges they will face in the English-medium universities or colleges. It is more than an English language course; it is a specialised preparation to help students create their own academic success while getting them geared up for tertiary study and life in Australia.

Course Objectives

Students successfully graduating from our EAP program at the advanced level are equipped with a range of study skills which promotes independent learning, cooperative learning through team work and discussion, research skills, analytical and critical thinking skills while sharpening their language skills that activate the growth of students' actual and tacit knowledge. As such, students will be able to perform well academically and to develop an awareness of the academic culture of English-speaking universities.

* Depending on your current English ability, you may enrol in our EAP programs up to 24 weeks to suit your personal learning needs and study goals.
